

Claims PTO 3/19/03

~~APPENDIX A - CLAIM AMENDMENTS~~
INCLUDING NOTATIONS TO INDICATE CHANGES MADE

Serial No.: 09/910,392
Docket No.: 54933US008

Amendments to the following are indicated by underlining what has been added and bracketing what has been deleted.

In the Claims

For convenience, all pending claims are shown below.

32. An array comprising:
 - a polymeric substrate comprising a relaxed oriented film or a relaxed elastomeric material, the substrate having a surface;
 - a mask layer on said surface, the mask layer comprising ink and linking agents wherein the mask layer has a projected surface area and a topographical surface area wherein the topographical surface area is greater than the projected surface area;
 - and at least one reactant affixed to one or more binding sites within the mask layer.
33. The ^{array} ~~article~~ of claim 32, wherein the mask layer has an optical density of about 0.5 or greater for light of selected wavelengths.
34. The ^{array} ~~article~~ of claim 33, wherein the mask layer has an optical density of about 1.0 or greater for light of selected wavelengths.
35. The ^{array} ~~article~~ of claim 32, wherein the topographical surface area is at least two times greater than the projected surface area.
36. The ^{array} ~~article~~ of claim 32, wherein the topographical surface area is at least five times greater than the projected surface area.
37. The ^{array} ~~article~~ of claim 32, wherein the topographical surface area is at least fifteen times greater than the projected surface area.

Amendment and Response - - Appendix A

Page A-2

Serial No.: 09/910,392

Confirmation No.: 1684

Filed: 20 July 2001

For: ARRAYS WITH MASK LAYERS AND METHODS OF MANUFACTURING SAME

38. The ~~article~~^{array} of claim 32, wherein the substrate is derived from a heat shrink film starting material.
39. The ~~article~~^{array} of claim 38 wherein the heat shrink film comprises biaxially oriented low density polyethylene, biaxially oriented linear low density polyethylene, biaxially oriented ultra low density polyethylene, or biaxially oriented ethylene vinyl acetate.
40. The ~~article~~^{array} of claim 32, wherein the linking agents comprise an azlactone moiety.
64. The ~~article~~ of claim 32 further comprising one or more binding sites within the mask layer.
65. - 66. (CANCELLED)
67. An ~~article~~^{array} comprising:
the article of claim 64; and
at least one reactant affixed to the one or more binding sites.
68. The array of claim ~~67~~³² wherein the reactant comprises one or more amino acids, one or more nucleic acids, one or more proteins, one or more carbohydrates, or a combination thereof.
69. The array of claim ~~67~~³² wherein the reactant comprises one or more oligonucleotides.
70. The array of claim ~~67~~³² wherein the reactant comprises cDNA.
